The book is about predicting two number combinations from 6 out of 49 lottery system in the UK and all over the World wherever the 6/49 lottery system is in operation. I have predicted two numbers that should come out from a specific group on a month by month basis. This is challenging the idea that Lottery numbers are unpredictable. As a mathematician and a scientist, I believe that certain elements of the system is predictable and I am hoping that Lottery enthusiasts would like to verify my results. To what extent will my prediction be in agreement with the 6/49 lottery results. If I am proving to be correct for predicting two number combinations, can I prove three number combinations and so on. There will be sceptics but you cannot argue with scientific and experimentally observed results.
