

A Treatise on Telegraphy Volume 4; Prepared for Students of the International Correspondence Schools, Scranton, Pa (Paperback)

Filesize: 2.2 MB

Reviews

This is the finest book i have got go through right up until now. I have got read and i also am confident that i am going to planning to read once again yet again in the future. You will not truly feel monotony at at any time of the time (that's what catalogs are for about if you check with me).
(Taylor Medhurst)

Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1901 Excerpt: . ergs are equivalent to 10,000,000 60 joules. From Art. 2333, 1 joule=.7373 foot-pound; then, 60 joules are equivalent to $60 \times .7373 = 44.238$ footpounds. Ans. (1187) From Art. 2400, $B = \frac{1}{\mu} H$; where B = the magnetic density, μ = the permeability of the magnetic substance, and H = the intensity of magnetomotive force. Substituting 180 for H and 450 for μ , $B = \frac{450}{180} = 2.5$. Ans. ELECTRICAL MEASUREMENTS. (QUESTIONS 1188-1229.) (1 188) The multiplying power of a shunt of 500 ohms resistance used with a galvanometer of 690 ohms resistance is (Art. 2488) Substituting the values of R , and R , given in this exam The current flowing through the galvanometer is, from formula 454, Substituting the values of C and $n + 1$ in the above for the current in the galvanometer when shunted. As a current of .06 ampere gives a deflection of 68 with this galvanometer, its constant may be calculated from formula 450, $C = K \tan \theta$. Substituting the above values, For notice of the copyright, see page immediately following the title page. In this example, $A = .1$, $l = 1$, $1 = 12$ cm. Substituting these values, 12 (11) In Washington, the value of the horizontal component of the earth's magnetism is .200. (Table 84.) Then, by formula 449, $f = H \tan \theta$. Substituting the above values, $f = .05236$ and $H = .200$, (1 190) A controlling magnet serves to vary the action of the earth's field on the magnet of the galvanometer,...
