# CHARACTERISTICS OF A HIGH INTENSITY, PULSED, POTASSIUM VAPOR LASER IN A HEAT PIPE

Biblioscholar Okt 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x4 mm. This item is printed on demand - Print on Demand Neuware - This thesis research paper presents the results of experiments using an optically pumped, pulsed potassium vapor laser in a heat pipe. The absorption on the potassium D2 line, output laser characteristics, and Raman scattering in potassium vapor are discussed. The spectral full width at half maximum (FWHM) of the D2 absorption line was much greater than predicted values...

#### Reviews

A new e book with an all new point of view. Better then never, though i am quite late in start reading this one. I am just quickly will get a satisfaction of reading a written publication.

-- Ms. Teagan Quitzon DVM

Comprehensive guideline! Its this kind of great go through. it had been writtern really properly and beneficial. I discovered this publication from my dad and i recommended this book to discover.

-- Constance Considine IV
